

# ONE HEALTH DAY SYMPOSIUM 2018

## What is One Health Day?

One Health Day, celebrated annually on November 3, is an international campaign co-coordinated by the One Health Commission, the One Health Initiative and the One Health Platform Foundation. The goal of One Health Day is to bring attention around the world to the need for One Health interactions and for the world to 'see them in action'. The One Health Day campaign is designed to engage as many individuals as possible from as many arenas as possible in One Health education and awareness events, and to generate an inspiring array of projects worldwide.

By participating in Ohio State's One Health Day Symposium, you are demonstrating your support for One Health worldwide.

## One Health Day Symposium

### KEY PROGRAM OBJECTIVES

- Provide a forum for internal and external stakeholders in public health and One Health-related fields.
- Strengthen awareness of the integrated, collaborative One Health approach.
- Share knowledge about enhanced surveillance, prevention, mitigation and intervention activities to address causes and effects of diseases at the interface of humans, animals, plants and the environment.
- Increase understanding of the impact One Health issues have on communities locally and globally.

### SYMPOSIUM COMMITTEE

Global One Health initiative  
College of Education and Human Ecology  
College of Food, Agricultural, and Environmental Sciences
